EDUCATION

B.tech (CSBS)	Sri Eshwar College of Engineering	8.59(3 rd -sem)	2024-2028
HSC	St.Ignatius Convent Higher Secondary School	85.9%	2023-2024
SSLC	St Ignatius Convent Higher Secondary School	90.6%	2021-2022

INTERNSHIP EXPERIENCE

BYTS | MERN-Stack | Duration: 1 month 2025

Pawtopia is a MERN-stack pet adoption web application developed to connect animal shelters with potential adopters through a user-friendly digital platform. The website allows users to browse available pets, view detailed pet profiles, search and filter pets based on various criteria, and submit adoption requests online. It also provides administrative features for managing pet listings and adoption applications.

SKILLS ACQUIRED:

Frontend: HTML, CSS, JavaScript, ReactJS

Backend: Node.js, Express.js, Spring-Boot, MongoDB, MySQL

PROJECTS

Hostile Health Planner	Sept 2025
Developed a Python-based Hostel Health Planner to help students manage their health and wellness efficiently. Implemented features for tracking daily health metrics, meal planning, exercise schedules, and health reminders. Utilized Python programming concepts, data structures, and file handling to organize and store user data, providing a simple and user-friendly health management solution for hostel residents.	
InsureEd AI	Apr 2026
Developed an AI-powered insurance awareness and micro- enrolment platform that simplifies policy understanding through intelligent query handling, document analysis, and personalized guidance. Integrated features such as simplified policy explanations, real-time assistance, and centralized insurance learning to improve accessibility, user experience, and informed decision-making.	
CrackIt AI	May 2026
Developed an AI-powered placement preparation platform that assists students throughout the recruitment process. Implemented features for resume analysis, personalized improvement suggestions, ATS compatibility checks, technical interview question generation, aptitude practice, and mock interview preparation	
Neuroband	Nov 2025
Developed a conceptual brain-computer interface solution designed to capture neural signals, process and encode them, and transmit the data to a connected receiver device. The project explores real-time brain signal acquisition, signal processing, wireless communication, and human-machine interaction technologies, with potential applications in defense, assistive communication, and advanced wearable systems.	

ACHIEVEMENTS

Finalist in Freshathon	Voltshare airbnb for E-Vehicles	March 2025
Project Recommended-MSME Idea Hackathon	Neuroband-The Silent Communication Helmet	Sept 2025

CODING PROFILES

Leetcode	Solved 250+ problems Global Ranking: 623,554 Profile Link: Linkedin
Skillrack	Solved 1200+ problems Global Rating:5,79,784 Profile Link: Skillrack
Hackerrank	2 stars in C-Language 2 stars in SQL Profile Link: Hackerrank
